j. Notification Regarding Obligations Pertaining to Bed Bug: The Resident agrees to comply and cooperate with the university regarding the prevention, reporting, and treatment of bed bug infestation.

**Appearance:** Bed bugs are tiny parasitic insects that, like fleas or mosquitoes, live on the blood of animals or humans. While they do not spread disease, the presence of bed bugs and their resulting bites are becoming more of a nuisance in community housing buildings such as hotels, dormitories, and hostels where travelers unknowingly spread them around. About the size of a grain of rice or smaller, and ranging in color from translucent to dark brown, bed bugs may enter a room undetected on clothing, luggage, or used furniture. For example, a traveler may pick up bed bugs in a hotel and transport them home in their luggage. Bed bugs do not fly, but can travel across floors or through wall openings (e.g. outlets), are nocturnal, and like to hide in mattresses, box springs, and bedframes.’

**Life Cycle and Reproduction:** An average bed bug lives for about 10 months. Female bed bugs lay one to five eggs per day. Bed bugs grow to full adulthood in about 21 days. Bed bugs can
survive for months without feeding.

**Bed Bug Bites:** A rash or trail of small red bites may be a sign of bed bugs. Whereas flea bites usually occur on the lower legs, bed bug bites may occur on any area of skin exposed during the night. Many people experience red bumps or bites, but there are some who exhibit no symptoms. Other signs of their presence include small dark brown spots on linens and mattresses.

**Common Signs and Symptoms of Possible Bed Bug Infestation:** Small red to reddish brown fecal spots on mattresses, box springs, bed frames, linens, upholstery, or walls; Molted bed bug skins, white, sticky eggs, or empty eggshells; Very heavily infested areas may have a characteristically sweet odor; Red, itchy bite marks, especially on the legs, arms, and other body parts exposed while sleeping. However, some people do not show bed bug lesions on their bodies even though bed bugs may have fed on them.

Information regarding UC Berkeley Cal Housing’s protocol addressing bed bug prevention, response, and treatment may be found on the UCB Student Housing web site at housing.berkeley.edu/bedbugs.

k. **Utilities:** The University shall provide all utilities, i.e. gas, electricity, water, refuse disposal, and elevator service, but cannot assume responsibility or liability for disruption of these services.
